EDUCATION

Bachelor of Software Engineering

Golis University
Expected to graduate in 2026

High School Diploma

Macrif Secondary School
2018-2019

PROJECTS

Fitness Website

Web Application
Created a responsive fitness website with user-friendly design and interactive features.

Quiz Website

Developed an engaging quiz website for educational purposes, enhancing user interaction and learning.

ANPR (automatic plate number)Website

- Built a computer vision system to detect and track vehicles in real-time using AI.
- Implemented vehicle classification and object tracking for traffic monitoring.
- Designed features to identify potential violations such as overspeeding and illegal parking.

Cargo Sytem

- Developed a cargo system to manage shipments, delivery status, and customer orders.
- Implemented features for cargo registration, tracking, and delivery confirmation.
- Built an admin dashboard for managing cargo data, drivers, and shipment history.
- Added search and filtering tools to quickly locate cargo records.

OBJECTIVE

Aspiring and motivated software engineer seeking a challenging position to apply strong programming, problem-solving, and software development skills in building efficient, scalable, and user-focused applications, while contributing to innovative projects and continuously enhancing technical expertise in modern technologies.

EXPERIENCE

WebDevelopment

Kifaax Technology Center
June 2022 -2025

- Designed, developed, and maintained responsive web applications using React.js, Node.js, Express.js, HTML5, CSS3, JavaScript, and MySQL.
- Built cross-platform mobile applications using Flutter and Dart for Android and iOS.
- Developed and integrated RESTful APIs to enable secure communication between frontend, mobile applications, and backend services.
- Implemented authentication, role-based access control, and database management to ensure secure user access.
- Collaborated with UI/UX designers and project stakeholders to deliver intuitive, user-friendly interfaces.
- Optimized application performance, reducing load times and improving overall user experience.
- Fixed bugs, performed testing, and maintained existing applications to ensure stability and reliability.
- Integrated third-party services such as payment gateways, maps, notifications, and cloud storage where required.
- Used Git for version control and collaborated with team members through GitHub.
- Participated in Agile/Scrum development, including sprint planning, code reviews, and daily stand-up meetings.

SKILLS

- Programming & Development: Python, Full-Stack Web Development (HTML, CSS, JavaScript, React, PHP, Node.js)
- Databases: MySQL
- Flutter
- Mobile Development: Flutter
- Operating Systems: Linux
- Networking: CCNA
- Other Skills: Basic server management, troubleshooting, version control (Git)

Marketing Intern

Somtel Marketing Department
