Application for Internship — Digital and Innovation (AI)

Dear Hiring Team,

I am writing to apply for the internship at the UNDP Digital and Innovation Hub. I recently completed my Bachelor of Software Engineering at Gollis University (2026) and have approximately three years of experience building web applications and backend services as a full-stack developer. I would like to bring that experience to work where technology is used to improve public services and support development.

My most relevant project is the SQCC Integrated Quality Control Management System, developed for the Somaliland Quality Control Commission. It organizes how regulated products enter Somaliland by connecting importers, inspectors, laboratory activities, and regulatory approval in one structured workflow, with shipment registration, document verification, multi-stage approvals, product traceability, and QR-based public verification. This project showed me how digital systems can make public processes clearer, more traceable, and easier to follow.

At Hogaan Technology Center (2021–2024), I built and maintained web applications using JavaScript, React.js, Python, and Node.js, designed databases in SQL, PostgreSQL, and MongoDB, implemented authentication and access control, and resolved issues across the frontend, backend, and database layers. I also worked on an Automatic Number Plate Recognition (ANPR) project, where I explored computer vision and OCR techniques to detect and read vehicle plates and designed a workflow for recording details such as time, location, and violations. Applied AI is an area I am keen to develop further through this internship.

I am motivated by the chance to apply these skills to development challenges and to learn from UNDP teams working on digital transformation and innovation. My six months in marketing at Somtel also gave me experience communicating and coordinating with colleagues, which I expect will help me work across teams.

My official degree certificate is pending issuance, and a university completion testimonial from Gollis University confirming my graduation is available. Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to the Hub.

Sincerely,

Hamse Saed Abdi Mohamed
